FunSim-J OnLine Fundamental Simulation Instructional Methods For Japan

FunSIM J-Online is an introductory multi-professional course for healthcare educators who are interested in learning about simulation education methods. The range of topics which can be taught with simulation is broad including emergency response, technical skills, teamwork training, and simple or complex case management. Interactive simulation-based education requires specific instructor skills, including scenario development, facilitation, and debriefing. You will gain Instructor knowledge and skills in these fundamental concepts in the blended learning FunSIM J- Online program.

Program:

- On-line Japanese language program
- Live ZOOM simulation from SimTiki and ChuraSim
- Breakout room group discussions and projects
- On-line dialogue and discussion forum

Sample Schedule:

I.	Day 1-3 Flexible	90 min Pre-course e-Learning Fundamentals & Terminology
II.	Day 4	3.5 hours ZOOM Roles Facilitation Barriers
III.	Day 5 & 6	90 min on one evening per person e-Learning Groupwork Assessment
IV.	Day 7	2 hours + 2 hours optional ZOOM Debriefing Project review

Adult Learning Theory	Debriefing	
Why Simulation	Instructional Design	Facilitation
